Tarps 4 Dump Trucks and Dump Trailers

11'x11' Industry Standard Mesh - non stock but available upon request, color, thread denier, and construction all varies. This is when all that matter is price. We are going to try to talk you out of this because for ~10% more your tarp quality will double.

Black Mesh - the only solid black material available in the US market, this 11'x11' Black Mesh. Similar to the above - mentioned material in yarn strength that is 3x stronger and construction. It is mainly for new truck sales and that makes sense. We now have Black Mega Mesh.

14'x14' Medium Mesh - with 14 threads per inch in both directions our Medium Mesh is 30% stronger than industry standard Multi Color Mesh at ~10% more cost. Our Medium and Mega Mesh are made by US companies, to our specification, to assure quality comes along with a competitive price. Color varies.

20'x20' Mega Mesh - with 20-1000 denier threads per inch in both directions, this is the best material on the market for roll-off trucks. It allows air to move through it, it is strong and difficult to rip or tear, it's weight does not cause issue with the spring loaded roller bar (which we sell) like other heavy mesh does. This fabric is so tough, dump truck drivers love it and we have taken over competitor business who are trying to copy us. Available in Multi Color and Solid Black.

3	Tarp (not included with systems)	Page 6-11			

** By adding head assembly to an arm set you have a complete system*

Mechanisms and Arm Sets

* Our mechanisms are made up of an arm set put together with a head assembly. This allows flexibility in the choice of Tarp axle, switch, and Motor which will work with the arm style of your choice. We recommend you inventory a couple head assemblies and a few arm sets which will help when a customer wants aluminum arms over steel arms but the head assemblies are the same for both, allowing less inventory and more options with a happy computer systems. We do have discounts when buying complete kits vs individual parts but that saving is already in the head assemblies and arm sets. Please call if you have any questions, its our job to help our customers get the best value!

Florida Free Freight Policy:

- **Orders of \$1,500 or More (Tarps + Small Parts):**
Qualifies for free freight if the order fits on a standard **4' pallet**. This includes items like tarps, motors, switches, springs, adjustable roller bars, and small parts.
- **Orders of \$2,500 or More (Most Mechanisms):**
Qualifies for free freight if the order fits on a pallet longer than **4' but shorter than 12'** (up to 144" in length)
- **Orders Requiring Pallets Over 12 Feet:**
For shipments exceeding 12' in length, free freight does not apply. Please contact us for a personalized freight quote.
- **Lumber tarp exclusions:**
Lumber tarps are not eligible for free freight, and their costs do not contribute to the free freight minimum.

Motor Warranty Process:

Motor warranties are covered by the original manufacturer. Before returning a motor, you must obtain a Return Authorization Number by calling 863-676-2579. Please note that the end user or dealer is responsible for all shipping costs.

The motor will need to be inspected before a warranty determination can be made, which may take several weeks. Only a Tarps4Trucks representative can authorize a motor warranty.

Tarps4Trucks reserves the right to replace the motor, issue a credit, or provide a new motor if it is found to be under warranty. Any remaining warranty on the original motor will be transferred to the replacement motor.

Return & Refund Policy:

Returns:

We offer full credit for returned items, which will be applied to your in-house account for further purchases, providing the following criteria are met:

- The item must be unused, in its original condition, and suitable for resale as new. If the item meets these “like new” requirements, we will issue a full credit (refer to the refund section for additional details).
- If the item does not qualify as “like new,” a 15% restocking fee will be charged. We do not accept returns of items that are damaged or broken and cannot be resold.
- The item must be one that we currently carry or manufacture.

Please note: Returns or refunds are not available for custom-made tarps, hammocks, or shades.

Shipping:

Return shipping costs are the responsibility of the customer. Please be aware that original shipping fees are non-refundable.

Refunds:

Upon receiving your returned item, we will conduct an inspection and promptly inform you of its status. If the item is eligible for a refund, a full credit will be applied to your in-house account for future use. The refund will be based on the original price paid (less any applicable shipping costs) or the current sale price at the time of the return, whichever is lower.

Additional Terms:

- A minimum order value of \$50 is required. We reserve the right to adjust any invoice below this amount to meet the \$50 minimum.
- Tarps4Trucks is happy to exchange parts that are in their original packaging, purchased within the last 90 days, and still available for sale at their full price.
- Free shipping is not offered for lumber tarps.
